

Steps to install and test MyE911 App (Windows Version)

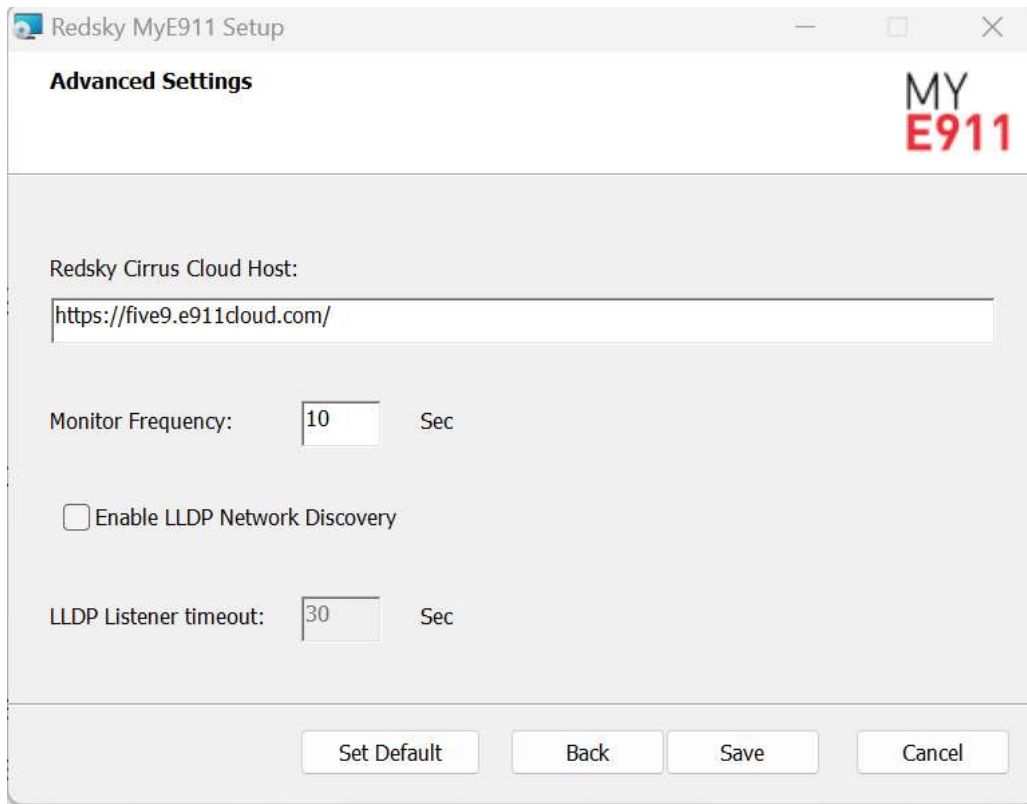

Note: Section 1 will require Admin Rights. If you do not have Admin Rights, Desktop support will complete this section. Remaining sections can be completed by the user.

Section 1 – Installation

1. Go to the below link
<https://software.usc.edu/mye911/>
2. Select Windows link for Windows users.
3. Once the file is downloaded, launch the windows installer package which pops up as shown below. Select Next.

4. The below screen pops-up, and enter the host as “<https://five9.e911cloud.com/>”
And click Save.

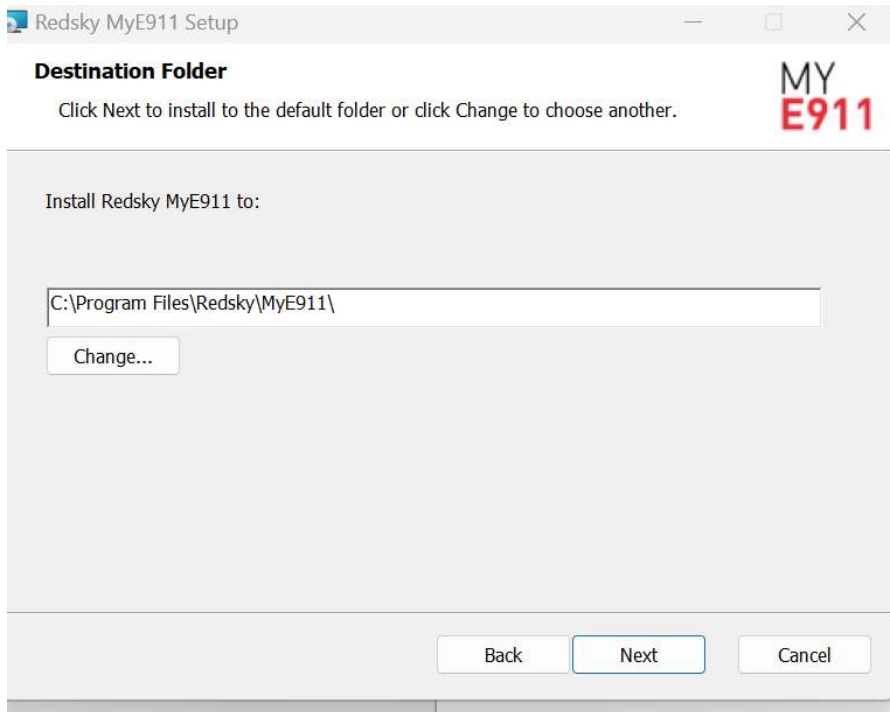

The image shows a screenshot of a software setup window titled "Redsky MyE911 Setup". The window has a standard Windows-style title bar with minimize, maximize, and close buttons. The main content area is titled "Advanced Settings" and features the "MY E911" logo in the top right corner. The settings are as follows:

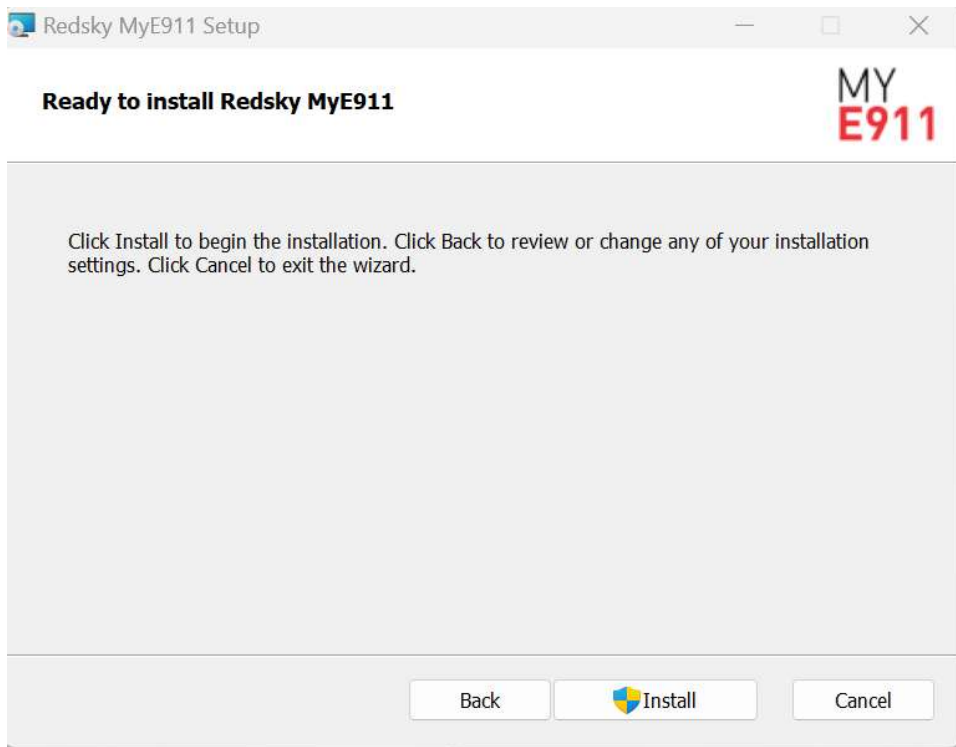

- Redsky Cirrus Cloud Host:** A text input field containing the URL "https://five9.e911cloud.com/".
- Monitor Frequency:** A numeric input field set to "10" followed by the unit "Sec".
- Enable LLDP Network Discovery:** An unchecked checkbox.
- LLDP Listener timeout:** A numeric input field set to "30" followed by the unit "Sec".

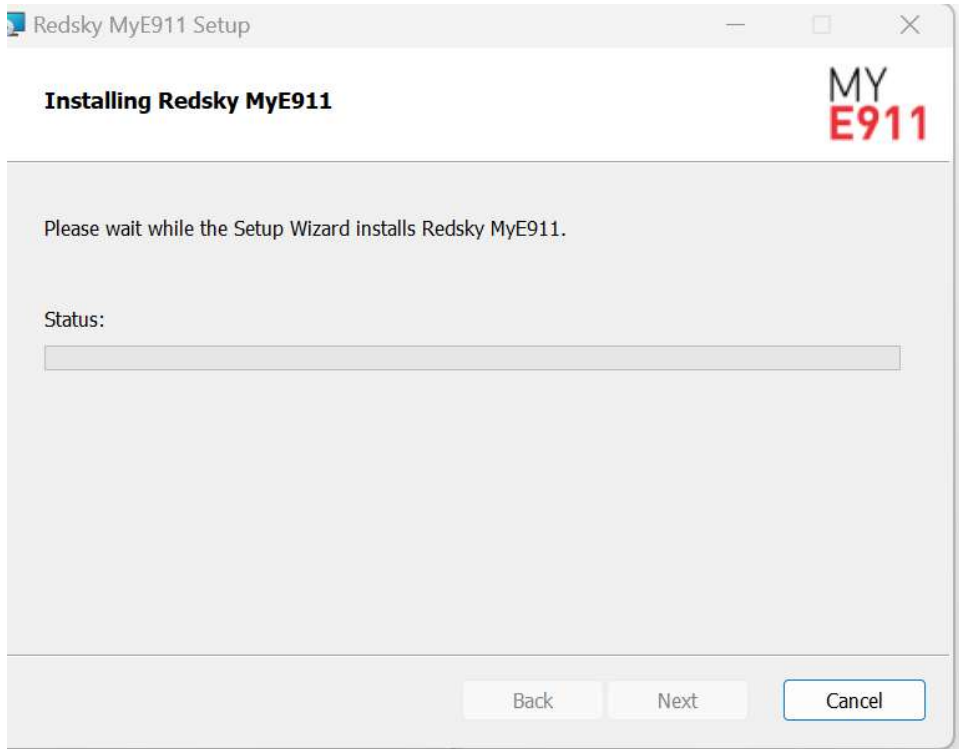

At the bottom of the window, there are four buttons: "Set Default", "Back", "Save", and "Cancel".

5. Choose your destination folder location. And click Next.

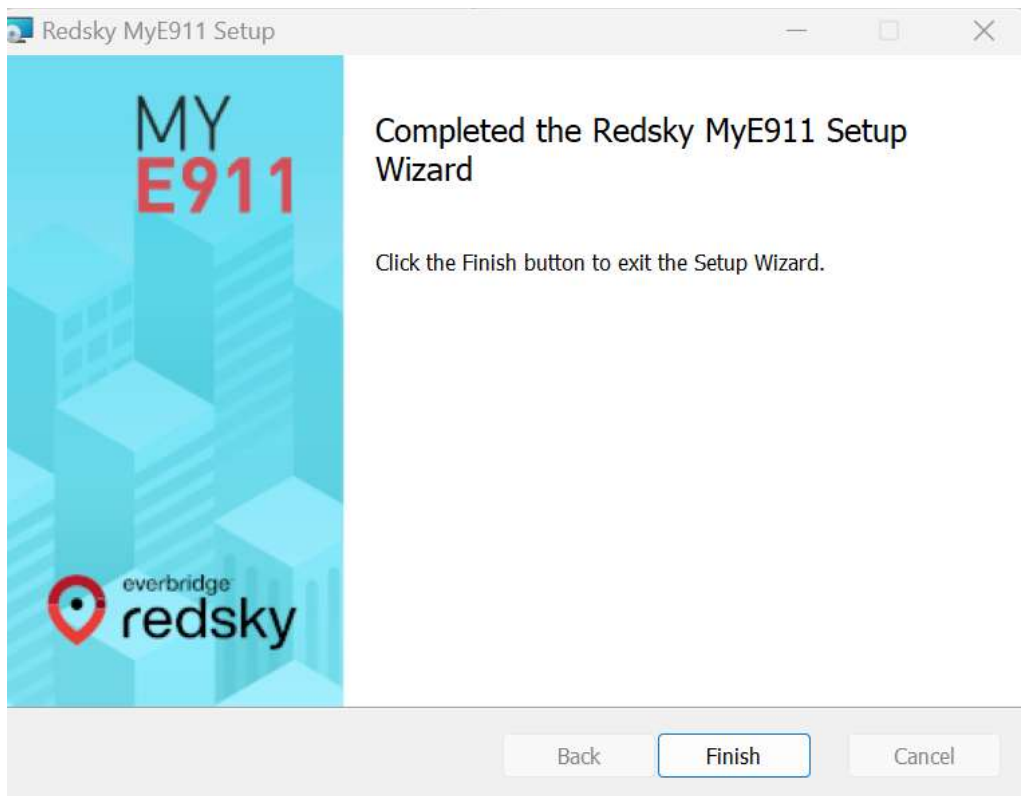

6. The below screen pops up and select "Install".

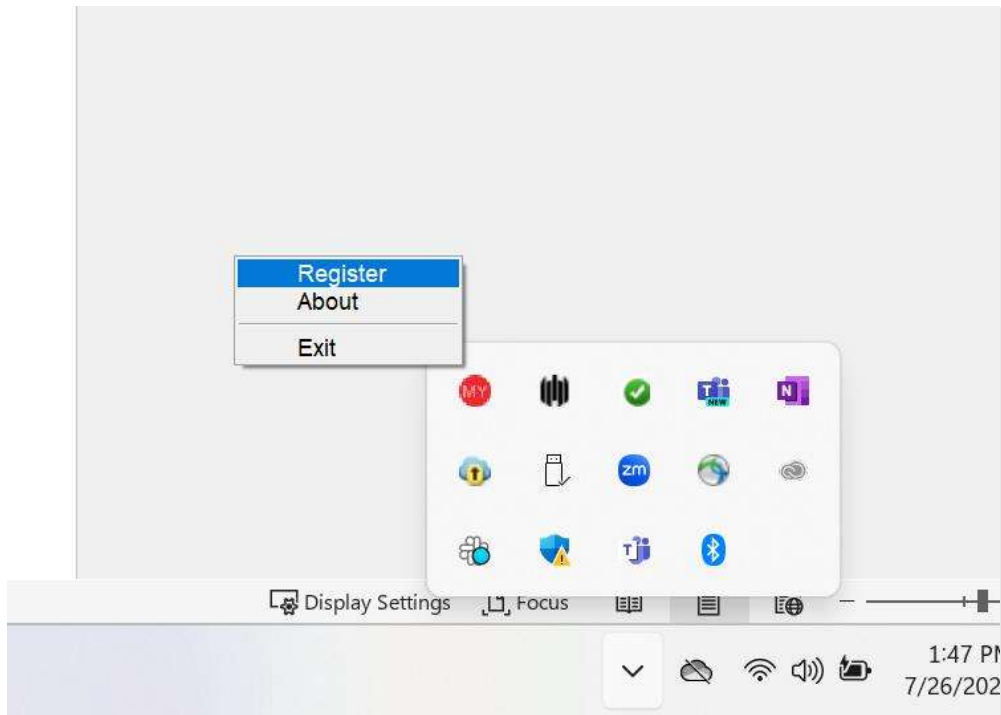

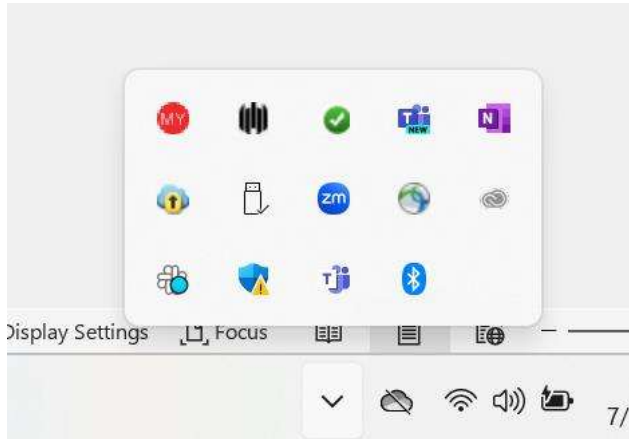

7. Click Finish.

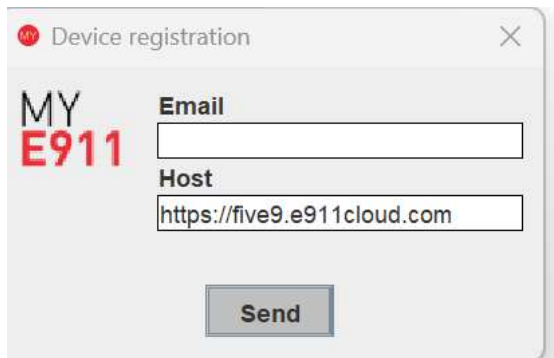

8. MyE911 app would have been successfully installed.

Section 2 – Location Set-Up

1. Once MyE911 is successfully installed, go to task bar, or toolbar and right click on MyE911 app and select “Register”.

2. Enter your Agent email address and host name as “https://five9.e911cloud.com”

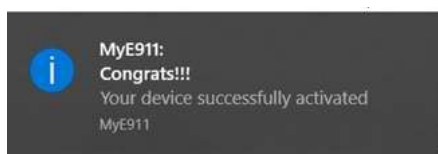

3. You will receive a verification code in your email and enter the verification code.

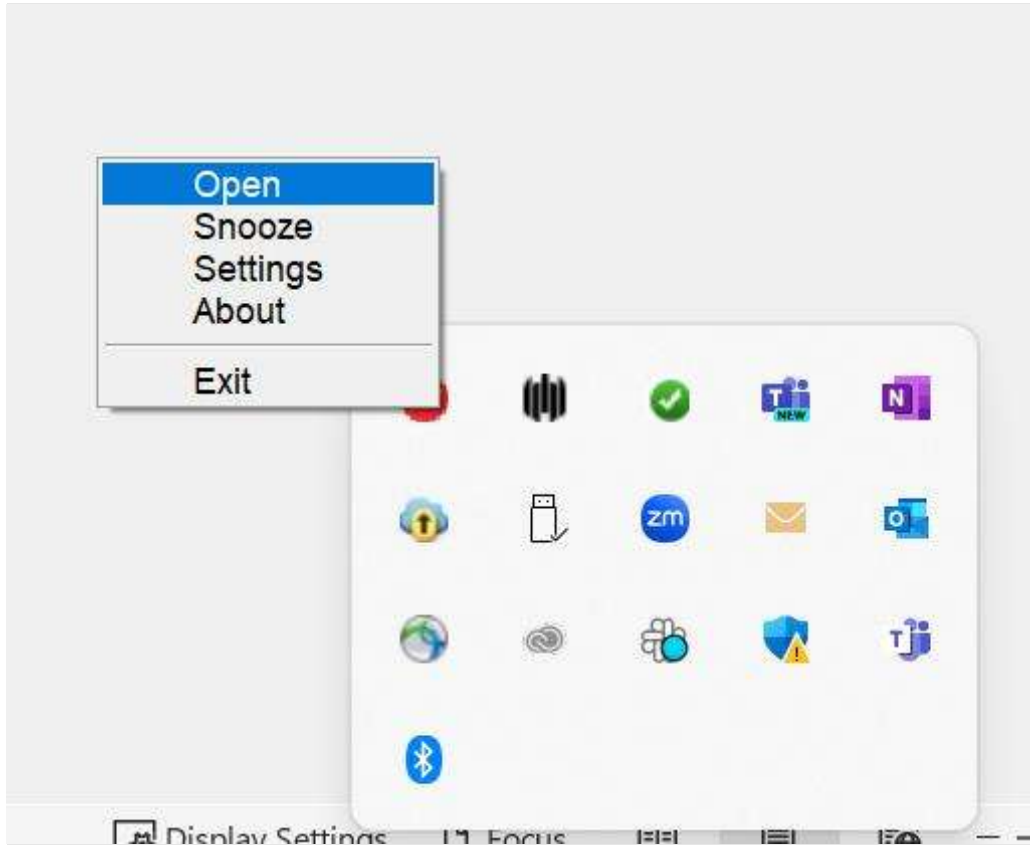

4. Enter the verification code into the “Device Registration pop up (See image below)

5. Once your device is verified you should receive a notification telling you that your device has been activated. (See image below)

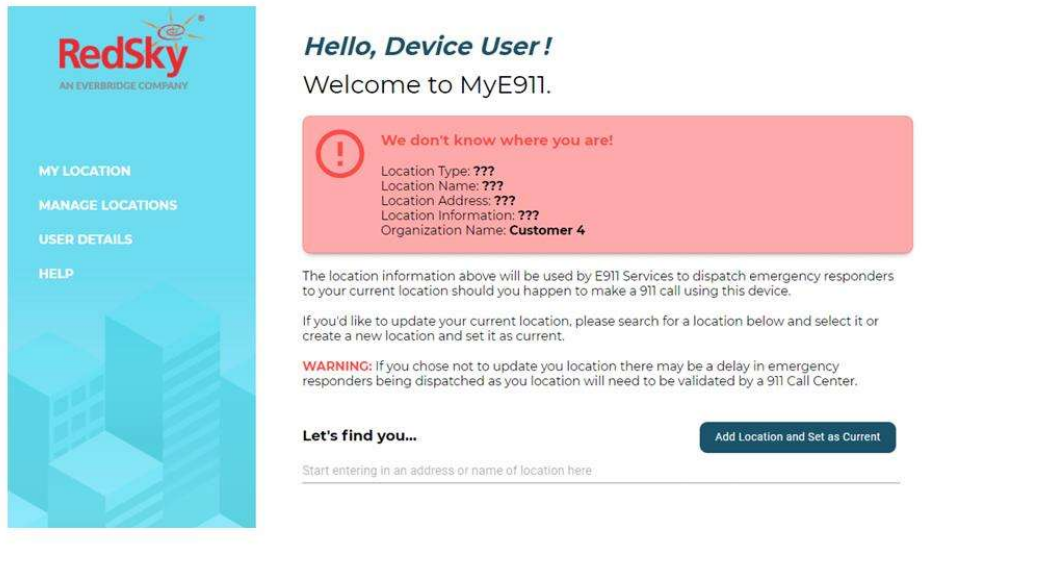

6. Launch MyE911 app by going to task bar, or toolbar and right click on MyE911 app. Select "OPEN"

7. MyE911 app opens in a web browser as shown below.

If the MyE911 application cannot determine your location, the MyE911 application will open the MyE911 Web UI, via your default browser, prompting you to select your 'Current Location'. (See image below)

8. Enter the address or location name of your 'Current Location'. The drop-down will auto-populate with a list of locations or addresses that closely match the information you've input. The locations can be: a. "Corporate Locations" – locations which have been provisioned by your Administrator for your company. These will have a building icon. a. "Personal Locations" – locations which you have previously added via the MyE911 web UI. These will have a house icon.

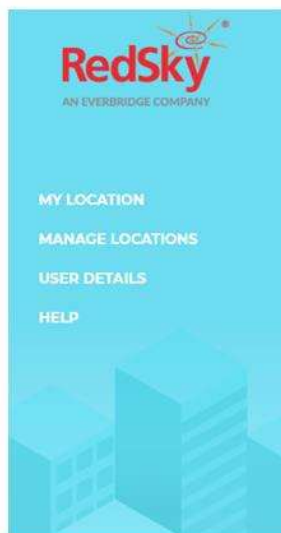

Let's find you...

Add Location and Set as Current

home

	Home 123 This Ave, This Place, IL 60000 Location Information: 1st Fl - Apt 1
	912 Delhomme Ave, Scott, LA 70583

9. Select the location which best describes where you are physically located now, and this will be set as your 'Current Location'. The "My Location" page will display a green success alert with information about your 'Current Location'. (See image below)

Device User

Welcome to MyE911.

Success! Your current location has been updated to:

Location Type: **Corporate Location**
Location Name: **Corporate HQ**
Location Address: **123 Main St, Your City, IL 60000**
Location Information: **16th Floor**
Organization Name: **Acme Corp.**

The location information above will be used by E911 Services to dispatch emergency responders to your current location should you happen to make a 911 call using this device.

If you'd like to update your current location, please search for a location below and select it or create a new location and set it as current.

Let's find you...

Add Location and Set as Current

Start entering in an address or name of location here

10. You can always open the MyE911 web UI and view the "My Location" page to ensure that MyE911 has correctly detected your 'Current Location'. You can also view this information from the "Manage Locations" page.

More results available, refine your search...

Once you hit dial you will hear an automated message playing your address and phone number that is configured in MyE911 app as shown above. Please validate your address and phone number in your 933-test call.

Note: Once the testing is complete, please share results with your supervisor.
